Portable

Come sempre nel nostro Dna c'è la voglia di superare i limiti e offrire prodotti innovativi e ricchi di creatività.

Abbiamo infatti scelto questi prodotti per rappresentare la nostra idea di nuovo e di design portatile.

Pensiamo che il design portatile sia ad una svolta e vogliamo dare il nostro contributo in tal senso, costruendo soluzioni di alto stile, dal gusto Made in Italy, sfruttando tutto il nostro know how derivante da decenni di cultura e lavoro nel settore.

I prodotti di questo catalogo racchiudono linee moderne, accessori indispensabili, facili soluzioni e idee brillanti.

Il packaging rivoluzionato e assolutamente attuale permette di trasportare i prodotti Fastand in comode valigette rigide, proteggendo meglio il contenuto e migliorando lo stivaggio.

As usual, in our Dna we fancy going beyond limits and offering innovative and creative items. Indeed, we chose these products in order to represent our idea of new and portable design.

Since portable design is thought to be at a turning point, we want to make our contribution to it, by creating high-style taste solutions and leveraging all our know-how, which is the result of decades of culture, work and experience.

The items in this catalogue contain modern lines, essential accessories, easy solutions and brilliant ideas, including a revolutionary packaging. In fact, we went from nylon bags to the plastic ones, which better protect the content..

Dettagli e materiali innovativi

Innovative details and materials

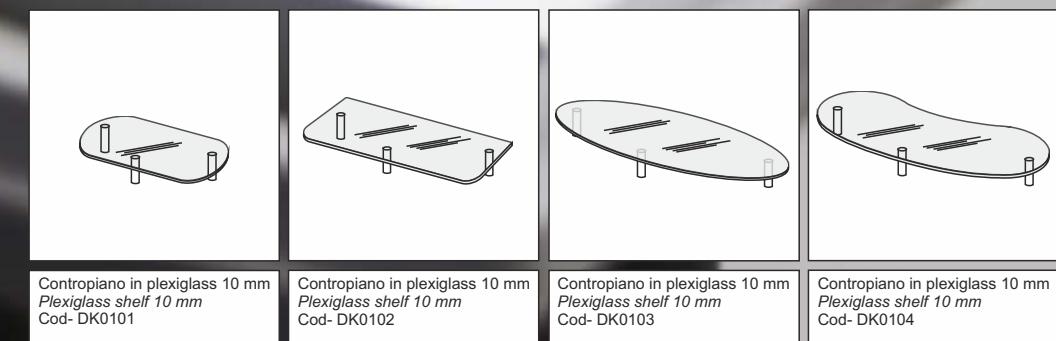

Alla base dell'unicità dei nostri desk vi è l'utilizzo di un materiale innovativo: il Fastflex. Questo viene utilizzato come rivestimento della scocca, dando al desk una grande rigidità e capacità di portata, con il grande vantaggio di essere flessibile, ma allo stesso tempo assolutamente antiurto e non piegabile.

Abbiamo scelto di migliorare la gamma dei nostri desk portatili, aggiungendo ricchi dettagli stilistici per fare la differenza e offrire sul mercato un prodotto unico.

Tutti i nostri desk sono infatti dotati di cassetto portaoggetti estraibile, mensola interna capiente, piano di appoggio in melaminico antigraffio di colore bianco, mensola abbinabile a tutte le stampe grafiche, ed infine pratico vano passacavi per tenere la superficie del desk sempre ordinata e professionale.

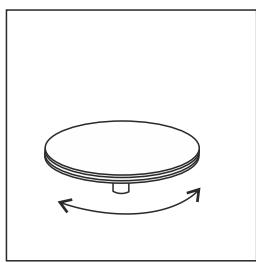

Our desks are made of an innovative and unique material: the Fastflex. Used as a shell coating, it gives the desk a great stiffness and capacity. Even if it is flexible, it is very shock-resistant and rigid.

We decided to improve our desks by adding stylistic details, in order to be different from the others and to launch on the market unique items. Indeed, all of our desks are equipped with a drawer, a spacious internal shelf, a top surface made of white scratchproof melamine, which can be easily matched with every graphics, and a practical fairlead compartment for electrical cables, in order to make the surface of the desk always professional and orderly.

Il colore per rafforzare la comunicazione

The color to strengthen the communication

Abbiamo cambiato le regole e inventato un nuovissimo modo di concepire il roll-up, ad oggi ancora il prodotto più rapido e intuitivo nel campo della comunicazione visiva portatile.

La nuova scocca in metallo, verniciata a polveri ad alta resistenza e con un nuovo e innovativo design minimal, ci ha permesso di eliminare i pericolosi e antiestetici piedini d'appoggio.

La base d'appoggio, così studiata e progettata, ha dato anche la possibilità di agganciare la serie di accessori portatili, rendendo questo roll-up un vero e proprio display combinabile e conformabile all'infinito. Inoltre, abbiamo dato spazio al colore: è infatti possibile scegliere tra 21 diversi colori.

We changed the rules and created a new way of seeing the roll-up, which is still the most intuitive product in the field of the visual portable communication.

Our roll-up's body, with an innovative design, is made of metal and varnished with high-resistance powders. This new structure let us eliminate the dangerous and unaesthetic base feet; moreover, it gives the opportunity to add a wide range of mobile accessories, making this roll-up a display with endless combinations.

Last but not least, our roll-ups are available in 21 different colours.

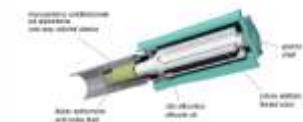

ADI

ADI sceglie Fastand

BRAKE SYSTEM

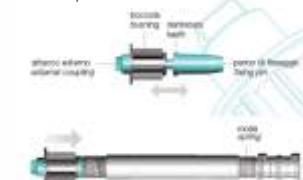

When the brake System starts to operate, the finned rotor immersed in the silicone oil bath inside the shell turns.

The special design of rotor fins and precise viscosity of the oil create friction and hence the braking force. The braking device only operate in one direction, namely in the phase of opening and rewinding the screen. During closure, the finned rotor is disabled by means of the one-way

PRELOADING DEVICE SYSTEM

It protects from eventual dangers due to return spring during load and unload operations
